1	Introduction.....	1
2	Developing an understanding of the groundwater system.....	4
2.1	Hydrogeological investigations.....	4
	Deep regional investigations.....	5
	Shallow regional investigations.....	9
	Local-scale investigations.....	11
2.2	Environmental water investigations.....	15
	Groundwater-dependent ecosystem studies.....	15
	Wetland studies.....	15
	River baseflow studies.....	16
	Cave studies.....	16
3	Biogeophysical setting.....	18
3.1	Physiography and topography.....	18
3.2	Vegetation and land use.....	20
3.3	Climate: past, present and future.....	24
3.4	Catchment hydrology.....	29
	Murchison River catchment.....	30
	Hutt River catchment.....	33
	Bowes River catchment.....	33
	Chapman River catchment.....	35
	Greenough River catchment.....	35
	Irwin River catchment.....	36
3.5	Groundwater-dependent ecosystems.....	41
3.6	Regional geological setting.....	44
4	Stratigraphy and lithology of the northern Perth Basin.....	50
4.1	Mullingarra and Northampton inliers.....	60
4.2	Yandanooka and Moora groups.....	61
	Yandanooka Group.....	61
	Moora Group.....	62
4.3	Tumblagooda Sandstone.....	63
4.4	Nangetty Formation.....	64
4.5	Holmwood Shale.....	65
4.6	High Cliff Sandstone.....	70
4.7	Irwin River Coal Measures.....	71
4.8	Carynginia Formation (including Mingenew Formation).....	72
4.9	Wagina Sandstone, Dongara Sandstone and Beekeeper Formation.....	74
	Wagina Sandstone.....	74
	Dongara Sandstone.....	75
	Beekeeper Formation.....	76
4.10	Kockatea Shale.....	77
4.11	Woodada Formation.....	78
4.12	Lesueur Sandstone.....	79
4.13	Eneabba Formation.....	80
4.14	Cattamarra Coal Measures.....	88
4.15	Cadda Formation.....	89
4.16	Yarragadee Formation.....	93
	Unit A.....	95

Unit B.....	98
Unit C.....	98
Unit D.....	99
4.17 Parmelia Group.....	104
Otorowiri Formation	105
Carnac Formation	105
4.18 Warnbro Group	109
Gage Sandstone.....	109
South Perth Shale	110
Leederville Formation	111
4.19 Winning Group.....	119
4.20 Coolyena Group.....	120
Osborne Formation.....	120
Molecap Greensand, Gingin Chalk, Poison Hill Greensand and Lancelin Formation	123
4.21 Surficial deposits.....	133
Monger Palaeochannel (Yarra Yarra Lakes)	133
Other channel and palaeochannel deposits.....	134
Yallalie Basin deposits (impact crater).....	135
Laterite.....	136
4.22 Superficial formations	138
Ascot Formation	139
Yoganup Formation	139
Guildford Formation.....	140
Muchea Limestone	147
Bassendean Sand	147
Tamala Limestone	148
Becher Sand.....	149
Safety Bay Sand.....	150
Miscellaneous deposits.....	150
5 Aquifers of the northern Perth Basin	152
5.1 Groundwater system overview	152
5.2 Superficial aquifer	173
Groundwater recharge.....	173
Groundwater discharge	174
Groundwater levels and flow	175
Hydraulic parameters.....	181
Estimates of groundwater throughflow	182
Groundwater salinity.....	182
Hydrochemistry.....	184
5.3 Surficial aquifer	186
Monger Palaeochannel (Yarra Yarra Lakes)	186
Channel deposits.....	187
Yallalie Basin deposits.....	187
5.4 Mirrabooka aquifer.....	187
5.5 Leederville aquifer	188
Groundwater recharge.....	189
Groundwater discharge	189
Groundwater levels and flow	190
Hydraulic parameters.....	195
Groundwater salinity.....	196
Hydrochemistry.....	198
Groundwater isotopic composition and age.....	198
5.6 Leederville–Parmelia aquifer	200
Groundwater recharge.....	202

Groundwater discharge	203
Groundwater levels and flow	206
Hydraulic parameters.....	212
Estimates of groundwater throughflow	213
Groundwater salinity	214
Hydrochemistry.....	215
Groundwater isotopic composition and age.....	216
5.7 Yarragadee aquifer	218
Groundwater recharge.....	225
Groundwater discharge	226
Groundwater levels and flow	227
Hydraulic parameters.....	234
Estimates of groundwater throughflow	235
Groundwater salinity	235
Hydrochemistry.....	237
Groundwater isotopic composition and age.....	240
5.8 Cattamarra aquifer.....	242
Groundwater recharge.....	242
Groundwater discharge	243
Groundwater levels and flow	243
Hydraulic parameters.....	243
Groundwater salinity	243
Hydrochemistry.....	244
5.9 Eneabba–Lesueur aquifer	248
Groundwater recharge.....	249
Groundwater discharge	249
Groundwater levels and flow	249
Hydraulic parameters.....	252
Estimates of groundwater throughflow	253
Groundwater salinity	253
Hydrochemistry.....	253
Groundwater isotopic composition and age.....	254
5.10 Bookara Sandstone local aquifer	256
5.11 Permian aquifers.....	256
Nangetty aquifer	256
Holmwood aquitard.....	257
Irwin — High Cliff aquifer.....	257
Carynginia aquitard.....	258
Wagina aquifer	258
5.12 Tumblagooda aquifer.....	258
Groundwater recharge and discharge	258
Groundwater levels and flow	258
Hydraulic parameters.....	258
Groundwater salinity	259
5.13 Yandanooka and Moora aquifers	259
Yandanooka aquifer.....	259
Moora aquifer	259
5.14 Mullingarra and Northampton fractured-rock aquifers	260
Mullingarra fractured-rock aquifer.....	260
Northampton fractured-rock aquifer.....	260
5.15 Geothermal resources	261
6 Groundwater resource availability and management	265
6.1 Managing groundwater at the regional scale	265
Using regional groundwater monitoring and numerical models	266

6.2	Factors to consider for groundwater development at the local scale	267
	Regulatory framework for licensing	267
	Using local-scale groundwater monitoring and modelling.....	269
	Aquifer suitability	269
	Environmental water requirements	271
6.3	Current and future use of groundwater in the northern Perth Basin	280
	Current groundwater use	280
	Projected groundwater demand.....	285
	Shortened forms	287
	Glossary	288
	References	301
	Appendices.....	327

Figures

Figure 1	Geographical area covered by the northern Perth Basin bulletin.....	3
Figure 2	Northern Perth Basin bulletin study area and the main hydrogeological investigations compiled in the bulletin	7
Figure 3	Deep exploration bores.....	10
Figure 4	Shallow regional investigations	14
