

Published water quality protection notes

Aerial spraying of crops with pesticides: 104	Landfilling with inert materials: 24	Rezoning and subdivision of land in PDWSAs: 54
Agriculture – dryland crops near sensitive water resources: 1	Landfills for disposal of putrescible materials: 111	Risk assessment of PDWSAs: 77
Aquaculture: 2	Light industry near sensitive waters: 93	Roads near sensitive water resources: 44
<i>Australian drinking water guidelines 6, 2004</i> – an overview: 78	Liners for containing pollutants, using engineered soils: 27	Rural abattoirs: 98
Bridle trails near sensitive water resources: 82	Liners for containing pollutants, using synthetic membranes: 26	Rural restaurants, cafés and taverns near sensitive water resources: 79
Chemical blending: 7	Mechanical equipment wash down: 68	Rural tourist accommodation: 88
Community drinking water sources – protection and management: 9	Mechanical servicing and workshops: 28	Service stations: 49
Contaminant spills – emergency response: 10	Mobile mechanical servicing and cleaning: 29	Soil amendment using industrial by-products to improve land fertility: 50
Cooling tower wastewater management and disposal: 99	Motor sport facilities near sensitive waters: 100	Stockyards: 80
Dairy processing plants: 12	Nurseries and garden centres: 32	Stormwater management at industrial sites: 52
Dam construction and operation in rural areas: 53	Nutrient and irrigation management plans: 33	Subsoil monitor drains and water recovery sumps: 31
Dewatering of soils at construction sites: 13	Orchards near sensitive water resources: 34	Swimming pools: 55
Extractive industries near sensitive water resources: 15	Organic material – storage and recycling: 90	Tanks – closure of underground storage: 64
Floriculture activities near sensitive water resources: 17	Pastoral activities within rangelands: 35	Tanks for elevated chemical storage: 56
General and heavy industry: 20	PDWSAs of Western Australia – a register of drinking water catchments in each local government: 108	Tanks for ground level chemical storage : 61
Groundwater monitoring bores: 30	Pest animal management in PDWSAs: 96	Tanks for mobile fuel storage in PDWSAs: 60
Hydroponic plant growing: 19	Pest control depots: 47	Tanks for temporary elevated chemical storage: 58
Identification, assessment and protection of PDWSAs: 87	Plantations in PDWSAs: 121	Tanks for underground chemical storage: 62
Industrial wastewater management and disposal: 51	Ponds for stabilising organic matter : 39	Toxic and hazardous substances – storage and use: 65
Infrastructure corridors near sensitive water resources: 83	Private drinking water supplies: 41	Tracks and trails near sensitive water resources: 81
Iron staining caused by irrigation systems: 21	Proclaimed PDWSAs: 75	Tropical agriculture: 101
Irrigation with nutrient-rich wastewater: 22	Protecting PDWSAs: 36	Vegetation buffers to sensitive water resources: 6
Laboratories : 23	Radiator repair and reconditioning: 42	Wastewater treatment and disposal – domestic systems: 70
Land use compatibility in PDWSAs: 25	Rehabilitation of disturbed land in PDWSAs: 84	Water supplies for rural lots (non-potable use): 48
Land use planning in PDWSAs: 76	Remote drinking water sources – self-supplied Indigenous communities: 89	Wineries and distilleries: 73

PDWSAs: public drinking water source areas
